

Tip & Trick – The Midnight Date Change Message

Brought to you by CriticalEdge Group

If a copy of Dynamics GP is left running, at midnight a pop-up box is displayed asking the user if they want to change the date. Everything else stops. If you are running some kind of automated or timed process that needs GP open, you do not want this message box to appear.

To stop this action, add the following line to the DEX.INI file on the workstation:

```
SuppressChangeDateDialog = TRUE
```

NOTE: Please contact us at support@CriticalEdgeGroup.com so that we can have the line added to the DEX.INI file. Please do not attempt to do this yourself if you are not familiar with the process.
