

The Process Monitor

Dynamics GP will run a number of tasks in the background. Sometimes when a task is started, it seems that nothing is happening. This is seen most often when printing large reports.

Check the Process Monitor (File -> Process Monitor). Tasks that are running in the background or waiting to run are listed in the Process Monitor.

Tasks with a Greater Than sign (>) in front of them can be deleted. This is useful if you have submitted a report several times while waiting for something to happen. Highlight the task to delete and click Remove.
